

## [Readme](#)

**Hope Learning:** An (demo) e-learning website elucidating the design principles to be followed to achieve an effective website design with certain principles, standards and guidelines.

**Description:** This website is **not** a fully functional website and is intended only to display and elucidate the design principles, guidelines and standards of making the website. Read 'Designing\_Tushaar G.pdf' to learn more.

### **Files in the directory:**

- *Readme\_Tushaar G.pdf*: Installation and description
- *Designing\_Tushaar G.pdf*: Design rules and principles implemented in the website
- *15IT117\_Hope\_Tushaar G.zip*
- *installer.php*
- *HCI Tools\_Tushaar G.pdf*: Relevant HCI tools discussed in the class

### **Installation Instructions:**

- Download the '15IT117\_Tushaar G.tar.gz' and uncompress it to get '15IT117\_Tushaar G' folder
- Dependencies:
  - Be sure you have PHP, Apache & MySQL installed on your local computer with software such as XAMPP, Instant WordPress, LAMP for Ubuntu or MAMP for MAC.
- Place the '15IT117\_Hope\_Tushaar G.zip' and 'installer.php' into a directory under where they can be served up by the local web server
- Installation:
  - Open a web browser (i.e Chrome, Firefox, IE) and browse to the 'installer.php' file such as: `http(s)://localhost/your-wp-directory/installer.php`.
  - On Step 1 › Click the next button
  - On Step 2 › Enter database setup info › test connection › click next
  - On Step 3 › Click the next button
  - On Step 4 › Login remove installer files
